

labmax substance identification

Steroid Substances	Steroid Test A Colour	Steroid Test B Colour	Steroid Test B Colour with UV Light	Stanozolol/ Oxandrolone Test	Clenbuterol/ Oxymetholone Test	Ephedrine Test
Alfadolone	Orange	Yellow	Nil	-	-	-
Androsterone	Orange	Yellow	White	-	-	-
Beclometasone	Brown-yellow	Orange	Nil	-	-	-
Betamethasone	Orange-brown	Pink-Orange	Nil	-	-	-
Boldenone Base (Equipoise, Ganabol) (pure powder)	Warm red after 2 min.	Dark Orange after 2 min.	Bright Light Orange	-	-	-
Boldenone Undecanoate (oil)	Dark brownish-red	Dark Red	Bright Light Orange	-	-	-
Boldenone Undecylenate (oil)	Orange - Light Brown	Dark Orange → Brown	Bright Light Orange-Yellow	-	-	-
Carbenoxolone (CBX)	Orange	Yellow	Yellow	-	-	-
Cholesterol	Violet	Orange	White	-	-	-
Clenbuterol (Spiropent, Ventipulmin)	-	-	-	-	Purple	-
Clomiphene (Androxal, Clomid, Omifin)	Brown	Dark brown hint of yellow-green on the sides of the ampoule	Nil	Dark brown to black	No reaction	Brown
Cortisone	Orange	Yellow	Green	-	-	-
Desoxycortone	Blue-black	Yellow	Yellow	-	-	-
Dexamethasone	Yellow	Orange-pink	Nil	-	-	-
Dienestrol	Yellow	Orange-red	Nil	-	-	-
Diethylstilbestrol (DES)	Orange	(→yellow-green)	Nil	-	-	-
Drostanolone Enanthate (Masteron) (oil)	Orange	Orange	Golden - Yellow	-	-	-
Drostanolone Propionate (Masteron) (oil)	Bright green	Yellow-Orange	Orange	-	-	-
Drostanolone propionate (powder)	olive - green	faint yellow	blue - greenish	-	-	-
masteron enanthate (powder)	no color change	no color change	blue	-	-	-
Ephedrine (also for Pseudo- and Nor-Ephedrine)	-	-	-	-	-	Orange
Estradiol (Oestradiol)	Orange	Yellow	Green	-	-	-
Estriol	Orange	No colour	Orange in daylight	-	-	-
Estrone (Oestrone)	Orange	Green-yellow	Green-yellow	-	-	-
Ethinylestradiol	Pink	Red-orange	Orange	-	-	-
Fludrocortisone (Florinef)	Brown	Orange -Brown	Green	-	-	-
Fludroxycortide (Haelan, Cordran)	Yellow	Yellow	Quenched	-	-	-
Fluocinolone (Flucort-N)	Yellow	Yellow	Quenched	-	-	-
Fluocortolone	Red-brown	Orange-yellow	Weak	-	-	-
Fluoxymesterone (Halotestin)	Yellow	Yellow	Quenched	-	-	-
hCG (human chorionic gonadotropin)	no color change	no color change	faint green	-	-	-
Hydroxyprogesterone	Blue, violet (dichroic)	Yellow	Quenched	-	-	-
Mestranol	Red	Orange-red	Orange	-	-	-
Metenolone Enanthate (Primobolan) (Oil)	Dark Orange-Brown	Dark Orange-Brown	Yellow-Orange	-	-	-
Methandrostenolone (Averbol, Dianabol, Danabol) (pill)	Red	Red	Yellow Orange	Red-Brown	-	-
Methasterone (Superdrol) (pill)	Light green	Light yellow	Nil	-	-	-
Nandrolone Decanoate (Deca-Durabolin) (oil)	Red-Brown	Orange-Brown	Green	-	-	-
Nandrolone Decanoate (Deca-Durabolin) (pure powder)	Yellow Green	Light Orange	blue - green	-	-	-

Steroid Substances	Steroid Test A Colour	Steroid Test B Colour	Steroid Test B Colour with UV Light	Stanozolol/ Oxandrolone Test	Clenbuterol/ Oxymetholone Test	Ephedrine Test
Nandrolone Phenylpropionate (Durabolin) (oil)	Nil	Yellowish-Orange	Green	-	-	-
Norethandrolone	Red-orange	Orange -Brown	Green	-	-	-
Norethisterone	Orange-brown	Orange -Brown	Orange	-	-	-
Noretynodrel	Brown-red	Orange -Brown	Orange	-	-	-
Oxandrolone (Anavar, Oxandrin) (pill)	No color change	No color change	Nil	Yellow Green after 15 minutes	-	-
Oxymetholone (Anadrol, Anapolon) (pill)	No color change	Faint yellow	Nil	-	Gray	-
Prednisolone	Brown	Orange-pink	Green	-	-	-
Prednisone	Orange	Yellow	Green	-	-	-
Progesterone	Yellow	Yellow	Quenched	-	-	-
Stanozolol (Winstrol) (pill)	No color change	No color change		Olive Green after 15 minutes	-	-
Sustanon 250 (Oil mixture of 4 testosterone esters)	Orange-Brown	Orange-Brown	Greenish-Yellow	-	-	-
Tamoxifen Citrate (Nolvadex, Istubal, Valodex) (pill)	Yellow → Dark Orange	Bright yellow → Bright Orange		-	-	-
Testosterone Cypionate (oil)	Orange-Red	Orange-Red	Greenish-Yellow	-	-	-
Testosterone Enanthate (oil)	Orange	Orange	Blue-Greenish	orange with blue - greenish for lower concentration	-	-
Testosterone Enanthate (pure powder)	No color change	Very faint yellow	Blue-Greenish	-	-	-
Testosterone Propionate (oil)	yellow - light green	Yellow	Blue-Greenish	-	-	-
Testosterone Propionate (pure powder)	red - green	No colour	Blue-Greenish	-	-	-
Trenbolone Acetate (oil)	Yellow > light orange	Yellow > light orange	Green	-	-	-
Trenbolone Enanthate (powder)	Yellow > light orange	Yellow > light Orange	Green	-	-	-
Trenbolone Enanthate (oil)	Light orange	Light Orange	Green	-	-	-
Turinabol (pill)	brownish green	Salmon pink	NIL	brown	-	-

The Stanozolol/ Oxandrolone, Clenbuterol/ Oxymetholone and Ephedrine tests contain crystals this is part of the test.

You can also calibrate your labmax test kit, you need HPLC (pharmacy) grade sample and then simply record the colors. Your sample has to be tested by a lab which can provide detailed analysis. If the lab is using only HPLC or GC to test, it means that they test only for presence of the main substance. They will not provide you with information if your sample is cut or contaminated with other substances. So it is not a good sample for calibration of the labmax test kit. You need lab which provides GC/MS or HPLC/MS testing, it is simply GC or HPLC attached with mass spectrophotometer. It allows to detect all know substances in your sample. **Here is interesting thing if lab results show that certain substance is present but it fails labmax test, it means that your sample is contaminated. So you can use your HPLC or GC results with labmax to see how clean your sample is.**
